

SOLANA MOBILE · CLOCK IN HACKATHON

Solarchik

A little solar robot on your rooftop.
Run, **clock in on Solana**, every day.

Native Kotlin Android app · v0.22.3 · Solana devnet

Vadym Bilobrovets — solo founder, team Solar DePin

THE PROBLEM

Crypto on phones is a dashboard you open once and forget.

No daily reason

Most wallet apps give you nothing to come back for tomorrow. Habits live in games and everyday tools.

Scary first step

New people hit wallet installs, seed phrases and fees before they see anything fun.

On-chain feels invisible

Even when something is signed, people rarely see what happened or why it matters.

I wanted one small habit — **show up, run, clock in** — that is fun on its own and quietly real on Solana.

SOLARCHIK

One rooftop. Everything around it.

- **Runner game** tuned for 90/120 Hz screens
- **Daily CLOCK IN** signed on Solana devnet, with a streak
- **Agent NFTs** on Metaplex Core — free mint, Pro for 0.1 SOL
- **Sol**, an AI friend with voice, changes agent strategies for you
- **Phone secretary** on a real +380 number: notes, transcripts, call back
- **Slice**, a paper portfolio of tokenized stocks (simulated)
- Guided tour + 60-second judges tour · Ukrainian / English

Rooftop home (v0.22.3 build)

DEMO · ROOFTOP & TOUR

Home is a rooftop, not a dashboard

Guided tour

Everything one tap away

60-s judges tour with Explorer links

DEMO · RUN & CLOCK IN

Run 1200 m, then sign the day

CLOCK IN signed on devnet

Wallet in one tap, agents as NFTs

No wallet app on this device

Seed Vault, Phantom or Solflare isn't installed. You can use the built-in devnet wallet instead: a key is created on this device and stored encrypted (Android Keystore), then filled with free devnet test SOL. Mints and buys are real devnet transactions you can check in Solana Explorer. Devnet SOL has no real value.

USE BUILT-IN DEVNET WALLET

CANCEL

No wallet app? Built-in devnet wallet

Wallet

devnet

Built-in · devnet

C9pVXx7leotYjaQr76gAgx7bmA67hZQivFTZ2UxGuWnz

REAL DEVNET SOL (ON-CHAIN) 0.0925 SOL

The key lives only on this device, encrypted by Android Keystore. Devnet test SOL only: it can't receive or spend real SOL. "Delete my data" erases the key.

Separate from this: the agents' paper purse (1 SOL) in Agents > Agent desk is simulated, nothing is sent on-chain.

Strategy agents

Each strategy is a Metaplex Core NFT you own. It forecasts and acts only within your limits.

DeskStrategiesMarketSlice

Agent desk

Nothing running

Strategies forecast on live market data and hold each position for one window. Positions are simulated; on Devnet the Free-tier 5% fee settles in devnet SOL.

Paper purse 1 SOL · simulated

Realized P&L 0 SOL

Today: 0 / 0.3 SOL used · losses in a row 0/2

PaperDevnet

Paper: a virtual 1 SOL purse. Any strategy, no mint needed. Fees are only recorded.

HOW IT WORKS

Architecture

ON-CHAIN PROOF

Real devnet transactions from the app code

Daily CLOCK IN (built-in wallet, finalized)	2FfPKtFz...hafpMuFL5
Free agent mint (Metaplex Core)	4ixhbEV1...UerUe9sLh7emD
Pro agent buy (0.1 SOL to treasury)	5RCh1qEA...xxhsEM6nV4Xkg7
Strategy change asked from Sol (risky, 5 min)	35PznYQb...Z7hAWy4goLsF
Wallet top-up from the Solarchik faucet	3y1uFvb9...w3euUQ3ZsL8irA4dP
Agent asset (Pro)	8ToSRXG5...8FaUqwkt

Links are clickable in this PDF. Devnet SOL has no real value; nothing here is mainnet.

WHY MOBILE · WHY SEEKER

This only makes sense on a phone

Daily habit

A check-in you do every day belongs on the device in your pocket, not on a desktop tab.

Seed Vault & MWA

Signing goes through Mobile Wallet Adapter, so Seeker's Seed Vault works out of the box.

Zero-friction start

No wallet app? A devnet key is created in Android Keystore and funded by our faucet.

A real phone number

The secretary answers real calls. That is a phone feature, full stop.

Smooth at 120 Hz

Native Kotlin rendering, not a webview — the runner is tuned for 90/120 Hz screens.

Voice first

Talk to Sol to change a strategy; you always confirm before anything is signed.

ROADMAP

What comes next

NOW

v0.22.3 on devnet

Runner, CLOCK IN, MWA +
built-in wallet, Metaplex
Core agents, Sol, phone
secretary, Slice, uk/en.

NEXT

SKR payments

Pay for secretary minutes
and Pro agents with SKR.

NEXT

Seeker holder perks

Extras for people who carry
a Seeker.

LATER

Mainnet

Only after a security audit.

Slice stays a clearly labelled paper portfolio until there is a safe, compliant way to do more.
